### 經濟安全與世界和平 Economic Security and World Peace

By ALVIN H. HANSEN

英森者 Externally France still faced Externally France still faced the German giant in the heart of Europe. The war had not changed this fundamental fact. This France fully recognized. The Maginot line on the west and the ring of buffer states on the east were the external symbols of her fear. But they were no answer to the utark tracks and gone on to high.

cause the great industrial nations did not understand and were wholly unprepared to face the economic problems of the postwar world. Everywhere there was an effort to revert to prewar policies and to restore the prewar economy. This effort failed. Price fluctuations in all countries, inflation in prospects? A great new fast of the stand and prospects of the decade of the countries, inflation in prospects? A great new fast of the great industrial nations in somic disaster which engulfed conting the deadleck in the work of the conting the co

Possibilities of Danger
Some diplomats expressed the belief that the current UN Assembly session held some mossibilities of danger to the future of the world organization.

Sweden and China have agreed to exchange Ambassadors, the Stockholm radio said last night.

was the return of 5,180 ex-miners from other industries in March : this is 2,200 more than in February. The figures indicate that reluctance to return to the industry has been overcome, partly because of the appeals that have been made and partly because the industry is now so much more attractive than it was. Probably the influence has been a combination of the two rea-

## 三月間的進出口 Exports And Imports

In March The figures for Britain's export trade in March are better than had been anticipated; but it was inevitable that the effect of the February in dustrial stoppages as a resul of the "fuel and weather" crisis should become apparent in the latter half of March Measured in terms of 1963 prices, the volume of exports in March is estimated at 98 per cent. of the 1938 volume, and compares with 93 per cent in February-a shorter month

Here in the fireroom you are directly under the roots of the funnel. A steel ladder leads up into the space around its base, which is known as the fiddley, and doorway there gives direct access onto the deck. But the visitor to whom Mr. MacDonald is showing his regions generally passes back into the engine reom again.
